OVERVIEW

The ISO 27001 Lead Auditor course provides professionals with the knowledge and skills to assess and audit Information Security Management Systems (ISMS) in accordance with ISO/IEC 27001, helping organizations protect critical information, manage risks, ensure compliance, and maintain business continuity.

01

Course Introduction:

This course provides a comprehensive understanding of ISO/IEC 27001 and the principles of auditing an Information Security Management System (ISMS) in line with international best practices.

02

Key Learning Focus:

Participants will learn how to plan, conduct, report, and follow up on ISMS audits to ensure compliance, effectiveness, and continual improvement.

03

Learning Outcomes & Practical Benefits:

The training equips professionals with the competence to assess information security risks, strengthen organizational resilience, and support certification and regulatory compliance efforts.

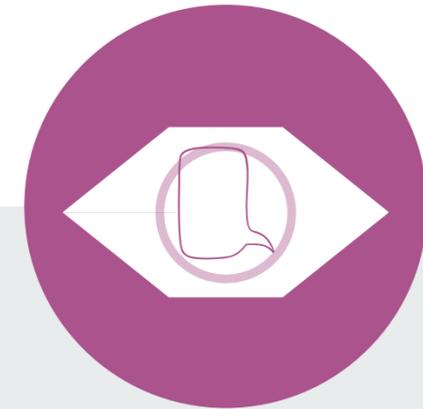

ISMS Foundation

Learn the purpose and benefits of an ISMS, how to set organizational context, create required documents, and define the scope and Statement of Applicability.

Auditing Concepts and Principles

Understand the role and essential skills of an auditor or lead auditor, along with core auditing concepts and principles aligned with ISO standards.

Planning and Conducting Audits

Gain practical knowledge to plan, conduct, and report audits effectively in line with ISO 19011, ensuring compliance and continual improvement.

TARGET AUDIENCE

“This course is designed for professionals responsible for information security, IT governance, risk management, and anyone seeking to implement or manage an ISO/IEC 27001-compliant ISMS.”

WHO SHOULD ATTEND

Core ISMS Members

CISOs

Implementation Professionals

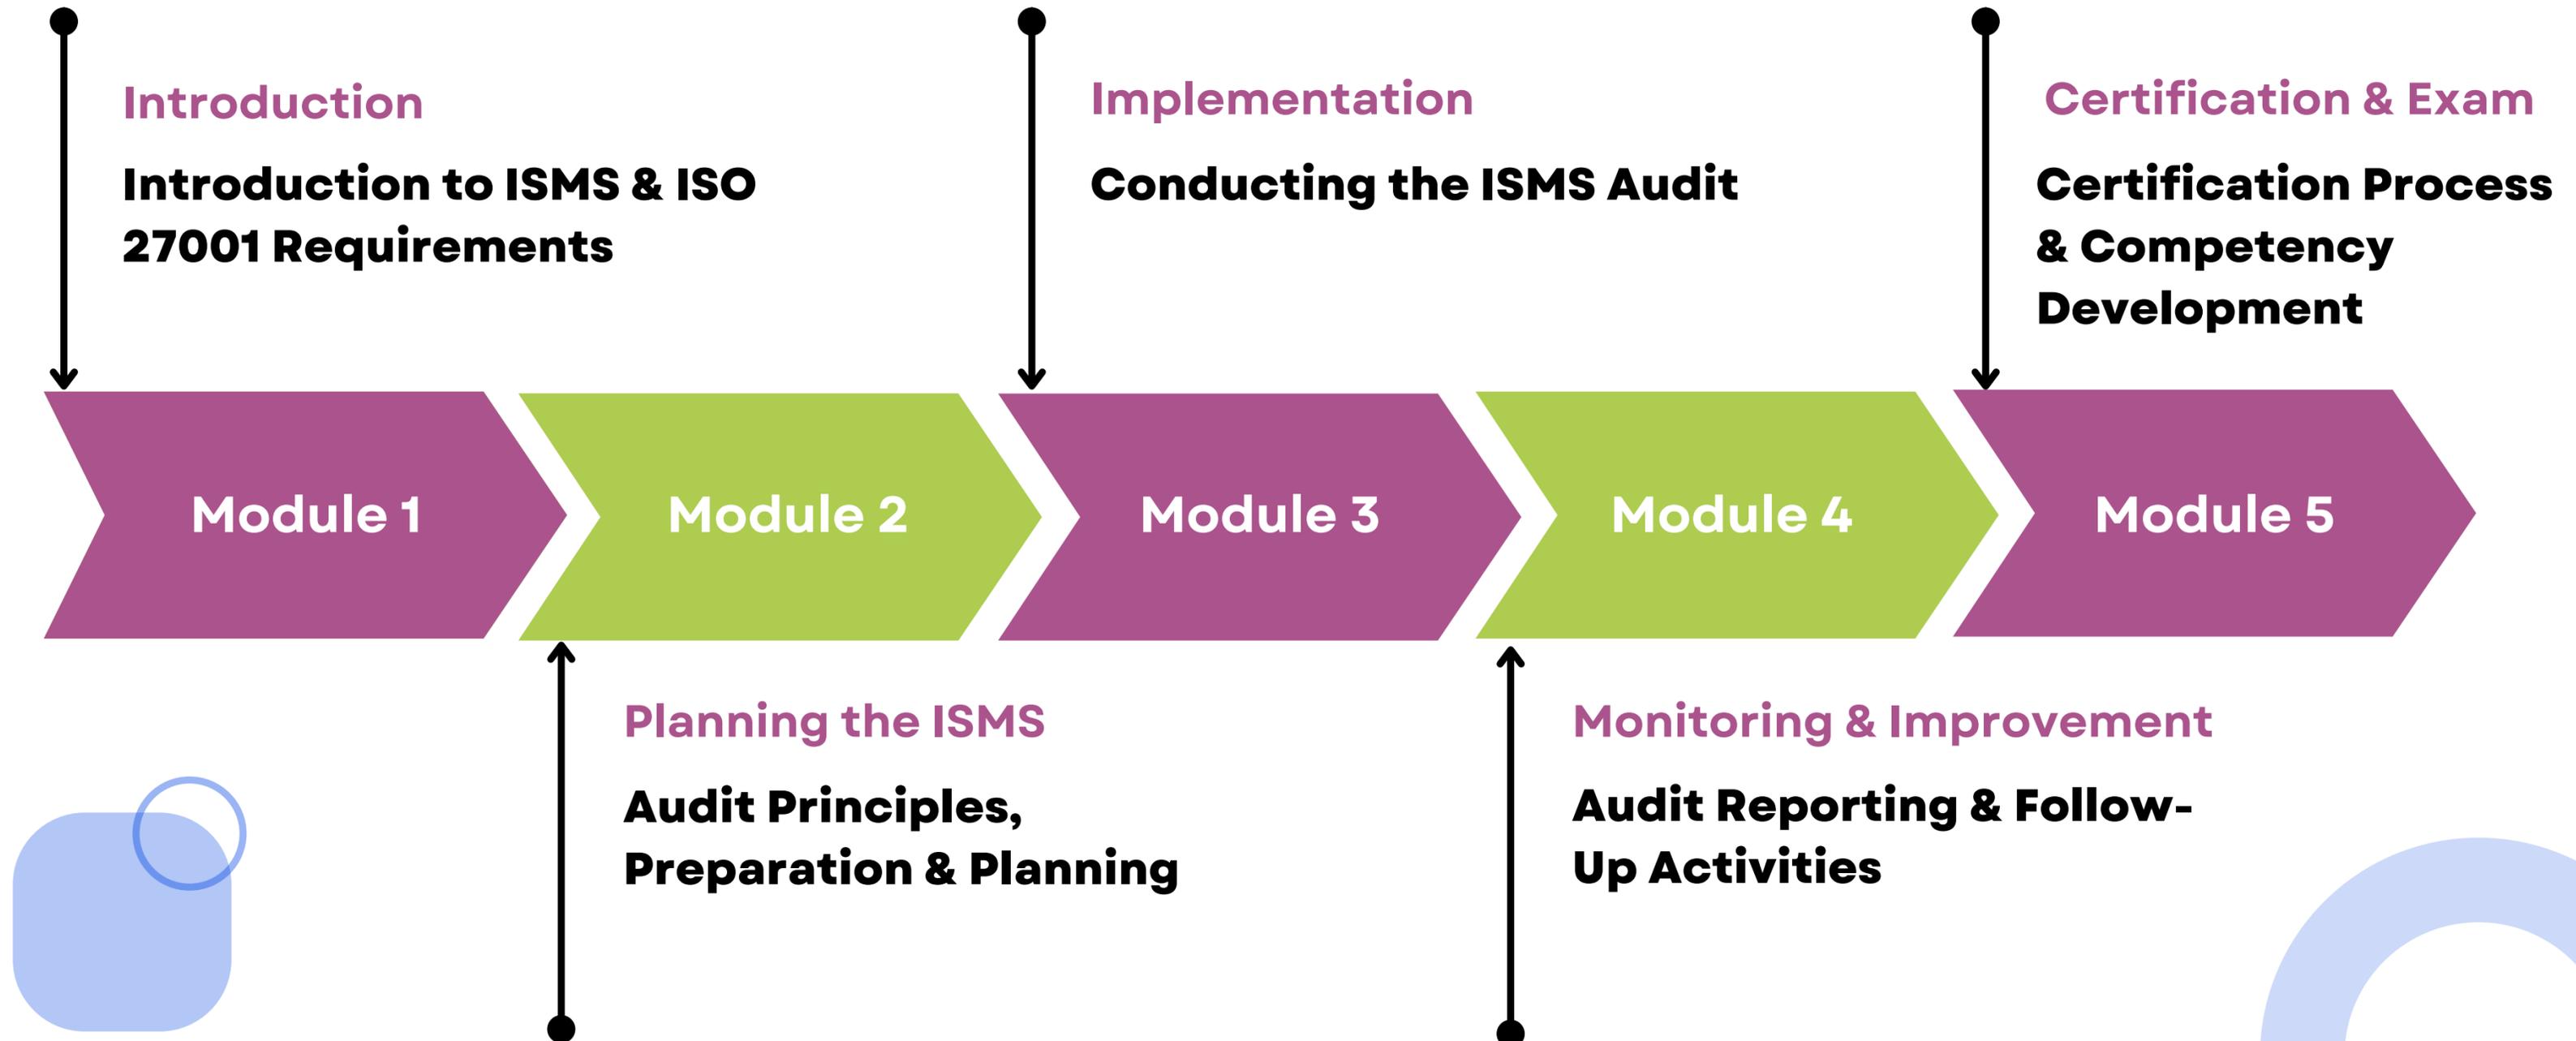

IT Heads

ISMS Consultants

ISMS Representatives

COURSE STRUCTURE

This five-day course provides a comprehensive framework, covering initiation, planning, implementation, monitoring, and certification of ISMS, combining lectures, practical exercises, and assessments for enhanced learning.

TRAINING METHODOLOGY

Course Materials

All participants receive comprehensive course materials, including detailed manuals, practical exercises, case studies, and reference guides to support learning and exam preparation.

Hands-On Labs

Participants gain practical experience through hands-on labs, applying concepts in real-world scenarios to reinforce learning and build confidence.

Assessments

Participants complete interactive assessments to test their understanding, reinforce key concepts, and ensure readiness for certification.

Certification

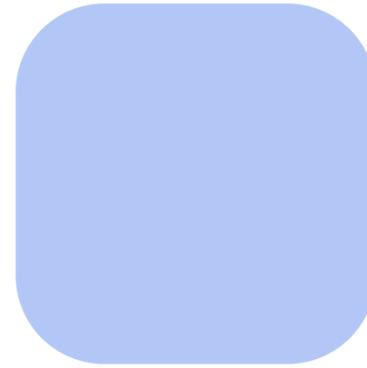

All participants receive an official Training Completion Certificate from Training Heights, validating their knowledge and skills gained during the course.

TRAINING DELIVERY

Training Heights offers both Virtual (Online) and Physical (Classroom) training sessions, giving learners the flexibility to choose the learning format that best suits their schedule, location, and learning preference.
